

SELDES S.A., your vision partner, designs and manufactures reconfigurable acquisition and image processing solutions based on powerful FPGA technology

**We will bring your vision applications into the real-time dimension
More flexibility, speed, reliability and performances**

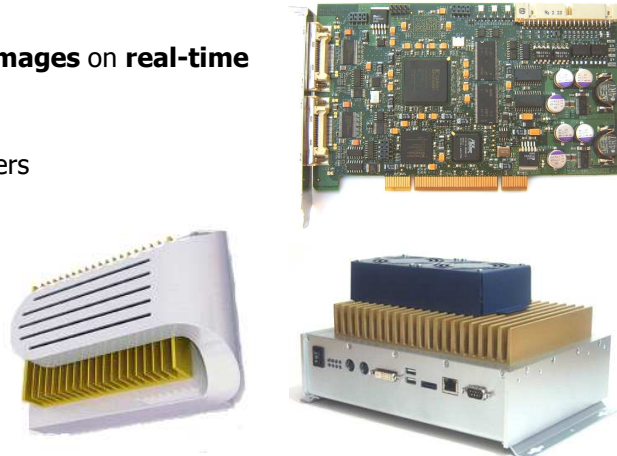

PRODUCTS

We provide OEM solutions to **acquire** and **process images** on **real-time** basis with:

- *Chameleon*, a family of PCI-based frame grabbers
- *Cougar*, a family of embedded vision systems

We provide application products i.e. in:

- Video surveillance (*LynxBox* & *e-Cat*)
- Inspection (*Eagle*)
- Endoscopy (*Medi-Cat*)

TYPICAL FIELDS OF APPLICATION

Industrial control, video surveillance, endoscopy, document scanning and much more.

SERVICES

- Does your company need **highly specific cameras** (linear, matrix, CCD, CMOS, high resolution ...) including or not **real-time image processing** ?
- Is your application too slow? Does it require **real-time vision algorithm running in programmable logic** ?
- Does your application **require embedded system including remote control, WEB FTP server** ?
- Does your application require **GigE, PCI-Express** or **COM-Express** standard interfaces ?
- Does your company need **programmable logic development** services ?
- Are you looking for a **partner** to integrate and offer solutions **adapted** to your end customers?

SELDES SA offers you more than 25 years experience in these fields

KEY FIGURES

- Created in 2000
- More than 25 years of experience in vision
- 5 technologies : acquisition, real-time processing, embedded, Internet/networking, camera CCD/CMOS
